PARTNERING SINCE 1996

INSTRON

Engineering Site Seminar

Tuesday, 11/1/22
9:00 - 11:30

Interested in how stuff works...or doesn't work?

Intron tests everything from crashing cars to crushing steel rods to measuring hair breakage or bandage adherence for new consumer products (yep, hair conditions and bandages!) and everything that can be measured.

Instron needs curious, engineer types to dream up new ways of doing this. Who works here?

Engineers of Every Kind:

- Software
- Mechanical
- Quality Control
- Production
- Manufacturing
- Applications
- Hardware

As well as...

- Supply Chain Management
- Distribution
- Calibration
- Metal Fabrication
- Worldwide Offices
- Sales & Marketing

INSTRON[®]

Trusted by scientists, engineers and quality managers worldwide, Instron is the leading provider of mechanical testing systems.

A Fortune 200 Company

Come for a site visit. Meet Instron engineers, see an amazing manufacturing site and test your hand at seeing how things work!

Free of charge to partnership schools
